OSI Vu-Graphs

Walt:

1. This is just to follow up on our conversation last week when I mentioned that Carl Duckett has asked me to check with the various offices about obtaining some new vu-graphs. Carl left it up to the discretion of the offices as to the content of the vu-graph. For example, he would like to have some general-purpose graphics on nuclear subjects taking into account the various security classifications. Since many of the briefings are SECRET-TOP SECRET, some new vu-graphs are needed in this area.

2. Carl would also like OSI and FMSAC to get together to work out with [REDACTED] a vu-graph showing various publications produced by OSI and FMSAC. Finally, he would like to have a complete set of ABM vu-graphs so that it would not be necessary to resort to various parts of the Agency when

a briefing is required on short notice.

3. As I mentioned, there is no deadline; but we would hope for some action on this request at your earliest convenience.
